- Relevant Coursework: User Experience Design, Strategic information and systems management,Web-Based Mobile App Development
- Grade: First class Honours (GPA 4.5) *20 Point Grade Scale ***

WORK EXPERIENCE

Front-End Developer | Consolidated Hallmark Insurance PLC | January. 2023 to Present
- Developed front-end single-page applications using JavaScript, TypeScript, and the Vue.js framework, resulting in improved application performance by reducing loading times by up to 70% and achieving a 50% increase in user satisfaction ratings.
- Translated Figma designs into code, paying close attention to detail and user experience, resulting in a visually appealing and intuitive interface, which contributed to an increase in user engagement and an 80% decrease in UI-related issues.
- Played a key role in eliminating manual approval processes with an access rights application, streamlining workflow, and improving efficiency by over 100%.
- Implemented DRY state management techniques into existing applications, enhancing code quality and boosting application performance by over 30%.
- Utilized Scrum and Agile methodologies, leading to increased productivity by 50% and ensuring successful project delivery on schedule.
- Conducted extensive testing pre-deployment, hereby improving application stability, significantly reducing bug reports, and enhancing overall user experience.

Software Developer Intern |Consolidated Hallmark Insurance PLC | September 2021 to December 2022
- Assisted in the development of front-end applications, focusing on JavaScript, TypeScript, and the Vue.js framework.
- Collaborated with senior developers to integrate API endpoints, contributing to the seamless functioning of applications.
- Proactively tackled technical challenges through research, learning, and upskilling, boosting my tech stack proficiency by over 200% and reducing turnaround time for complex tasks by 60%.
- Delivered efficient first-level user support, reducing response time by 50% and increasing user satisfaction. Resolved queries within service level agreements, ensuring a seamless user experience.
- Collaborated effectively with junior developers and business analysts to gather project functional and business requirements, ensuring clear project understanding.
- Gained exposure to Agile methodologies, actively participating in sprint reviews and team retrospectives.
- Demonstrated a strong work ethic and commitment, leading to a seamless transition from intern to full-time software developer.

WORK EXPERIENCE

Web Developer | Smartteller Technologies | April 2020 to January 2021
- Revamped the company's web application's user interface and web experience, resulting in improved user engagement and satisfaction.
- Conducted thorough software testing and refinement, resulting in a 20% decrease in post-deployment issues and improved software reliability.
- Resolved web application bugs based on user feedback, improving functionality and user experience with a 60% decrease in reported bugs and a 80% increase in user satisfaction.
- Managed the company's database of over 10 million users, ensuring data integrity, security, and efficient retrieval of information.

TECHNICAL SKILLS

Programming Languages

- Proficient In the use of JavaScript, Typescript, HTML, and CSS in creating web interfaces and integrating with back-end.
- Familiar with the use of Node, and Express, In creating REST API's.

Frameworks/Systems
- Proficient with the use of Bootstrap and familiar with Tailwind CSS for styling components
- Proficient with the use of VueJS, NuxtJS, VueX, and Pinia in building single-page applications and consuming APIs
- Proficient with API testing using Postman and SwaggerUI
- Familiar with the use of Firebase and MongoDB for cloud storage
- Proficient with the use of Github for version control and familiar with the command-line interface

Soft Skills
- Effective communication and time management
- Creativity and attention to detail
- Teamwork and collaboration
- Adaptability and Continuous Learning
